

AMR Final Project

Julia Töws, Rene Hadder, Tim Dörpinghaus

Abstract—Write your abstract here.

Index Terms—Write up to three keywords about your work.

I. PROJECT DESCRIPTION

A. Motivation

Describe the context of your work and the motivation for it.

B. Problem Statement

Describe the problem you are addressing in the work.

C. Proposed Approach

Write a short summary of your proposed approach.

II. DESCRIBING THE CODE

Describe the code you have implemented and its functionality. keep it short and simple, but don't miss important steps. explain functionalities you added extra to the basic algorithm briefly.

A. Task 1: Path and Motion Planning

B. Task 2: Localization

C. Task 3: Environment Exploration

III. EXECUTING THE CODE

This is a section in which you describe how you executed your code. Start with describing the environment and then describe how you executed the code in the simulation and on the real robot. this section is to show the results of the executed code.

A. The Simulation

B. The Real Robot

IV. CHALLENGES

Describe the challenges you faced during the project and how you overcame them.

A. x

B. Connecting to the Robot

C. y

D. Time Management

V. CONCLUSIONS

Write a short summary of your conclusions and the lessons learned during the project.

*Submitted to the Department of Computer Science at Hochschule Bonn-Rhein-Sieg in partial fulfilment of the requirements for the degree of Master of Science in Autonomous Systems

‡Submitted in September 2026

STATEMENT OF ORIGINALITY

I, the undersigned below, declare that this work has not previously been submitted to this or any other university and that it is, unless otherwise stated, entirely my own work. The report was, in part, written with the help of the AI assistant Claude Code as described in the appendix. I am aware that content generated by AI systems is no substitute for careful scientific work, which is why all AI-generated content has been critically reviewed by me, and I take full responsibility for it.
